INTRODUCTION

Tally is powerful accounting software, which is driven by a technology called concurrent multi-lingual accelerated technology engine. It is easy to use software and is designed to simply complex day to day activities associated in an enterprise. Tally provide comprehensive solution around accounting principles, inventory and data integrity. Tally also has feature encompassing global business. Tally software comes with easy-to-use interface thus making it operationally simple. Tally accounting software provides a solution around inventory

management, stock management, invoicing, purchase order management, discounting, stock valuation methodology, etc.

Tally accounting software also comes with drill down option, which can track every detail of transaction. It helps in maintaining simple classification of accounts, general ledger, accounts receivable and payable, bank reconciliation, etc.

1. The technology employed by tally makes data reliable and secure.
2. Tally software supports all the major types of files transfer protocols.
3. This helps in connecting files across multiple office locations.
4. Tally accounting software is capable of undertaking financial analysis and financial management.
5. It provides information around receivables turnover, cash flow statement, activity consolidation and even branch accounting.
6. Tally accounting software is east to set up and simple to use. A single connection can support multiple users.

7. It can be easily used in conjunction with the internet making possible to publish global financial

HISTORY OF TALLY

Tally solutions was co-founded in 1986 by Shyam Sunder Goenka and his son Bharat Goenka after the family's cotton business was destroyed by fire. It began as Petronius financial accountant, an accounting software application. The company was incorporated in 1991 And was renamed Tally Solution in 1999.

Shyam Sunder Goenka was running a company that supplied raw materials and machine parts to plants and textile mills in southern and eastern Indian. unable to find software that could manage his books of accounts, he asked his son, Bharat Goenka, 23, a Math's graduate to create a software application that would handle financial accounts for his business. The first version of the accounting software was launches as an MS-DOS application. It had only basic accounting functions, and was named Petronius financial accountant.

VERSION OF TALLY

- Tally 4.5 was the first version of tally. It was released in 1990. This software is based on MS-DOS
- Tally 5.4 was second version of tally. It was released in 1996. It was a graphic interface version.
- Tally 6.3 was third version of tally. It was released in 2001. This version was window based.it supports printing and implementing with VAT (Value Added Tax).

- Tally 7.2 was the next version of tally. It was added with new features of statutory complimentary version and VAT rules as per state wise.
- Tally 8.1 was the next version of tally. It was developed with a new data structure. It was added with new feature of point sales (POS) and payroll.
- The next version was Tally 9. It was released in 2006. This version was released due to bugs and errors. This version has maximum features such as TDS, FBT, Payroll, E-TDS filling, etc.
- The new version of Tally is ERP 9. IT WAS RELEASED IN 2009. Tally ERP 9 package is offering maximum features for small to large business industries. It also updates with new features of (goods and services tax) GST.
- THE latest version of tally is Tally Prime. It was released in 2020 prime package is offering maximum features for small to large business industries. It also updates with new features of (good and service tax) GST.

ADVANTAGE OF TALLY

- Streamlining financial management – Tally is a software that helps to organize and simplify financial tasks, such as invoicing and bookkeeping.
- Enhancing accuracy- Tally's features, such as automatic calculations and error checking, help to reduce mistakes and increase precision in financial record keeping.
- Enhancing security – Tally's password protection and data backup options help to secure financial information and prevent data loss.
- Facilitating collaboration- Tally's ability to be accessed by multiple users simultaneously allows for easier collaboration among team members in financial management.
- Customization – Tally offers customizable option and report templates, allowing users to tailor the software to their specific needs and preferences.

DISADVANTAGE OF TALLY

- Initial cost- Tally is a software that requires an initial purchase or subscription fee, which may not be feasible for all users.
- Limited features- Tally may not offer all the features that some users require for their specific financial management needs.
- Complexity- Tally may have a steep learning curve for some users, requiring time and effort to master its various functions.

- Dependence on technology- Tally requires a computer or other device with an internet connection to function, which may not always be available or reliable.
- Vulnerability to cyber threats- Tally, like all software, is vulnerable to cyber attacks, which could compromise the security of financial information.

ANSWER TO THE QUESTIONS

(1)What is Tally?

Tally is a popular accounting software used in many countries, including India. Tally is a digital accounting format, and the entries are maintained similarly to the manual book of accounts. ERP 9 (release 6.6) is the latest release version, which will be replaced by the new version Tally prime.

(2)How to open tally software?

Downloading the application setup from the tally solutions website is the first step in starting tally prime. Once you download Tally Prime setup files, you can install the application on your computer. Installation steps remain the same regardless of Tally ERP 9 edition you have purchased. You can install Tally ERP 9 on any computer with 64-bit edition of Microsoft windows 7 or later. For further details, refer to the topic Recommended system configuration for tally prime.

1. Download the setups files.

- a. Go to: <https://tallysolutions.com/download/>.

- b. Click download. The exe will get downloaded in the Downloads folder.

You can copy and paste it to any folder, if needed.

2. Install Tally Prime.

- a. Double-click setup.exe.
- b. Double-click Install New.
- c. Configure Application path, if needed.

By default, the application will be installed at C: Program files tally ERP 9.

- Click... and change the path as needed.
- Close the list of configurations window.

- d. Click Install.

The application gets installed, and the following window opens.

- e. Click start Tally ERP 9 to launch Tally ERP 9.

You can activate the license, and thereafter, you can start using Tally ERP 9.

(3) HOW TO CRAETE A COMPANY?

Ans. Below are the steps to create a company in Tally ERP 9.

- Type the name of your company. For example, "Max Electronics"
- Type your address and select your state or province • Country will be selected automatically
- Type your Pin code
- Mention the contact details of your company
- Next, specify the financial year from which you want to maintain your books in Tally ERP 9.

(4) How to select a existing company from list of a company?

Ans. Just keep the mouse pointer over a Company name, with which you want to work on and press the Left Mouse Button. If you want to load a company which is not there, hold the Alt Key and select the F3 Key using the Keyboard.

(5)How to delete a exiting company?

Ans. If you no longer need the group company, you can easily delete it without affecting the data of the member companies.

- Press Alt + K (Company) > Alter, and select the group company.
- In the Group Company Alteration screen, press Alt + D to delete the company.
 - Press Enter to confirm the deletion.
- After you delete the group company, you can continue to use the member companies without any difficulties.

(6)How to alter exiting company?

Ans. If your company address, phone number, or any other contact information was not provided earlier or has changed, you can update such details in Tally Prime. Any changes made to these details will be reflected accordingly in your reports and printed invoices.

1. Press Alt + K (Company) > Alter.

2. In the Company Alteration screen, make the necessary changes.

3. Accept the screen. As always, you can press Ctrl + A to save. If you do not need the company anymore, you can delete the company as well.

1. Press Alt + K (Company) > Alter.

2. In the Company Alteration screen, press Alt + D. The company will be deleted permanently.

If you want to access the business transactions recorded in the company at a later time, you can take a backup of the company before you delete it. Note that once you delete the company, you cannot retrieve it, and therefore keeping a back up of the company data is recommended.

(7) How to display the list of companies already created?

Ans. From menu choose select company option then you will find the list of companies, which are created using the create company option under the company info.

Menu from the list choose any one of the companies.

(8) How to create a ledger account?

Ans. 1. Press Alt+G (Go To) > Create Master > type or select Ledger and press Enter.

Alternatively, Gateway of Tally > Create > type or select Ledger and press Enter.

2. Enter the Name of the ledger account. Duplicate names are not allowed.

3. Enter the alias of the ledger account, if required. You can access the ledgers using the original name or the alias name.

4. Select a group category from the List of Groups. Note: To create a new group from this field, press Alt+C. You can alter a ledger account to change its group classification at any time.

5. Enter the Opening Balance. The opening balance is applicable when the ledger is an asset or a liability, and also if it has a balance in the account as on the books beginning date.

6. Press Ctrl+A to save, as always.

Note: For an existing company, debit balances for assets and credit balances for liabilities are applicable. You can enter balances for accounts that have obverse balances such as revenue accounts. For example, you may have transferred your books to Tally Prime in the middle of the year and may not have closed them in your earlier system. Hence, you must specify debit or credit for the balance.

(9) how to enter vouchers entries in tally?

1. Go to gateway of tally >Accounts info or inventory info>voucher type>create.
2. Enter the name of the voucher.
3. Select the type of voucher as sales.
4. Enter the abbreviation in Abbreviation field, id required.
5. Select the method of voucher numbering from the methods of list, which appears as shown below.
7. Enable Use effective dates for voucher to enter effective dates for vouchers.

Note: select this option if you have a transaction under consideration for overdue/ageing analysis recorded currently but will come into another effect on date. If the effective date is entered, the /ageing will be considered from the effective date and not from voucher date.

8. Enable Make this voucher type 'optional' by default to set your voucher to optional voucher by default.

Note: For Memorandum and Reversing journal voucher the option Make this voucher type 'optional' by default is not available.

9. Enable Allow narration in voucher to give a common narration for voucher. A common narration screen for voucher appears as shown

10. Enable provide narration for each ledger in voucher?
If you want to give a separate narration for each entry of a voucher. This would be applicable for a multiple entry voucher where you want separate details for each entry. The narration for each entry appears as shown below:

For delivery Note, Receipt note, Sales order, Purchase order, Physical stock, Stock journal, Rejection in and Rejection Out, the option Provide narration for each ledger in voucher? Is not available.

10.Enable Print voucher after saving to print every voucher after entering it.

Note: Depending on the type of voucher selected to create or alter, different printing features appear in this field. For example, if you select Receipt as type of voucher, the option Print Formal receipt after saving will be displayed.

11. Set use for POS invoicing to yes to use the sales invoice as POS invoice.

12. Set the default title to print on invoice to print the same title for POS INVOICE.

NOTE: Default print Title option will appear only in sales voucher type.

13. Select the bank in default bank option to print the default bank ledger when the option Print bank details is enabled in a sales voucher.
14. Enter the default jurisdiction to be printed on the invoice, if required.
15. Create a voucher class in the Name of Class field, if required.

The completed voucher type creation screen appears.

(10) How to create secondary ledger from voucher entries page?

Ans. You can create ledger during voucher creation from all voucher type available in Tally Prime.

1. From Voucher creation/Alteration screen, press Alt + C from ledger field. The ledger creation screen appears.

2. Create the ledger.

(11) How to create groups?

Ans. In Tally Prime, apart from the given predefined groups, you can create groups as per business need. You can create a group one at a time or multiple groups in one go. You can create group under an existing group or create a group under the primary and then select the Nature of group. The below procedure shows how to create account groups one by one under an existing group.

1. Press Alt + G (Go To) > create Master > type or select Group and press Enter. Alternatively, Gateway of Tally > Create > type or select Group and press Enter.

2. Enter the name of the group.

3. Enter the alias name, if required. If it is not entered separately then it shows the name of group.

4. In the field Under, from the list of groups displayed, select the parent group has to be classified; for example, indirect Expenses.

Note: Groups can be created under the group Primary, if required. After selecting Primary, you can select the nature of group.

The group creation screen appears.

5. Accept the screen. As always, press ctrl + A to save the Group creation screen.

Note: A new group created under primary will not be reflected in reports until you pass master/transactions for that group. Similarly, you can create multiple groups in one go from that chart of accounts using the multi creation option.

You can also create group under primary and select the nature of group.

1. In the group creation, screen, enter the name of the group.

2. In the field under, select primary.

3. In the nature of group select from the list depending on the nature of the group created.

4. Fill in the other details and press ctrl + A to save. Once you have created the groups, you can start creating ledger under the predefined or newly created groups.

(12) How to alter group?

Ans. You can view the groups created by you or even the predefined groups one by one.

1. Press Alt + G (Go to) > Type or select chart of accounts > group > and press Enter. Alternatively, gateway of tally > Chart of Accounts > Group > and press enter.

2. Select the name of the group required from the list of group displayed. The group alternation (secondary) screen appears.

You can view the group and if required you can alter the details as well.

If you want to alter the details entered in a group, you can do that in the group alternation (secondary)

1. In the group Alternation screen the under-group field, select the name of the group from the list of groups displayed.

2. Make the necessary changes in the group Alternation screen.

3. Accept the screen. As always, press ctrl + A to save the group alternation screen.

Similarly, you can alter multiple groups in one go from the chart of accounts using the multi Alter option.

(13) How to delete group?

Ans. Groups can be deleted from the alternation screen. You cannot delete groups from the multiple group Alternation mode.

1. Go to Gateway of Tally > info. > Groups > Alter (under single Group).

2. Select the group from the list of groups.

3. Click D: Delete.

4. Click Yes to confirm Deletion.

(14) How to create multiple ledger?

Ans. Press Alt + G (Go to) > Chart of Accounts > Ledger > Press Enter.
Alternatively, gateway of Tally > Chart of Accounts > ledgers and press Enter.

Press Alt + H (Multi-masters)> Multi create and Press Alt + H (Multi-masters). Multi create and press enter.

In the multi ledger creation screen, provide the required ledger details.

a. Under Group: press backspace to change the parent group, if needed. By default, the primary group for ledger creation is set as all items. You can also press Alt + H (Change Parent Group) to alter the group.

b. Name of ledger: Enter the ledger name.

c. Under: select the parent group for that ledger from the list of groups.

Note: if you have selected a specific parent group in under Group, the Under field gets prefilled in each row without you having to select the group again. Press Alt + c to create a parent group if needed.

d. Enter the opening balance.

4.To provide other details based on the ledger you have created, press ctrl + I (More Details).

a. If you are creating a Bank ledger, under More Details, select Bank A/C Details or Bank Configurations.

b. If you are creating a Party Ledger, you can similarly select Mailing Details or Contact Details.

The details will be added to the selected ledger.

5. Once you have provided the details for all the ledger, as always, press Ctrl + A to save.

(15) How to display multiple ledgers?

Ans. In tally application after ledger are created, we can check multiple ledger by choosing the display option.

Gateway of Tally > Accounts info > Ledger >> Multiple Ledger >> Display and press Enter.

Under the list of group, choose the group's name

Now the multiple ledger screen will be displayed.

(16) How to print a sales invoice?

Ans. You can print your sale invoices recorded in Tally. ERP 9 by clicking Alt + P in the sales invoice. On the sales invoice, you can customize your print configuration by pressing F12.

1. Go to Gateway of Tally > Accounting Vouchers > f8: sales.
2. In the sales invoice, press Alt + P to print the invoice.
