

**Assignment -1****1. Create following table in MS Excel****Using merge & centre****Alignments****Table borders****Calculation-Sum, Average, Max, Min**

| STUDENT RECORD SEM 1 |         |         |         |       |         |     |     |
|----------------------|---------|---------|---------|-------|---------|-----|-----|
| Roll No              | Marks 1 | marks 2 | marks 3 | total | average | max | min |
| 1001                 | 98      | 45      | 34      |       |         |     |     |
| 1002                 | 67      | 56      | 45      |       |         |     |     |
| 1003                 | 79      | 67      | 56      |       |         |     |     |
| 1004                 | 90      | 78      | 77      |       |         |     |     |
| 1005                 | 56      | 89      | 88      |       |         |     |     |
| 1006                 | 34      | 98      | 76      |       |         |     |     |
| 1007                 | 56      | 87      | 45      |       |         |     |     |
| 1008                 | 78      | 76      | 69      |       |         |     |     |
| 1009                 | 89      | 65      | 86      |       |         |     |     |
| 1010                 | 34      | 54      | 74      |       |         |     |     |
|                      |         |         |         |       |         |     |     |

**2. Create following Table****Calculate DA, HRA, and GROSS 0050AY**

| Salary Record for the Month of September 2017 |           |             |           |          |           |           |
|-----------------------------------------------|-----------|-------------|-----------|----------|-----------|-----------|
| Emp Code                                      | Name      | Designation | Basic Pay | DA (10%) | HRA (10%) | Gross Pay |
| e001                                          | Umakant   | Production  | 13000     |          |           |           |
| e002                                          | Ramakant  | Manager     | 25000     |          |           |           |
| e003                                          | Umesh     | Manager     | 25000     |          |           |           |
| e004                                          | Heena     | Production  | 19000     |          |           |           |
| e005                                          | kamalkant | Accounts    | 17000     |          |           |           |
| e006                                          | Preeti    | Accounts    | 15000     |          |           |           |
| e007                                          | Mamta     | Production  | 18000     |          |           |           |
| e008                                          | Jiya      | Manager     | 30000     |          |           |           |
| e009                                          | Amita     | Production  | 20000     |          |           |           |

## **Assignment -2**

1. Save the file in your folder on desktop
2. Open The Student Record File, Apply Table Formatting→Font Style, Font Size, Font Color, Fill color, Borders, Wrap Text
3. Clear Formatting
4. Copy and paste the Table in another sheet (sheet 2)
5. Apply format as table (Auto formatting)
6. Rename the sheet as “Student record”
7. Open Salary Table
8. Copy and Paste salary table on sheet 2 (using paste special option, Paste link)
9. Make changes in original sheet of student record in Roll No 1009, marks1= 80, marks2= 90, marks 3= 92
10. Check the changes in second sheet

## **Assignment -3**

1. Apply conditional formatting on Student record table as per following.
  - ✓ If Total is greater than 200 apply red font color , Fill color Yellow
  - ✓ If average is greater than 60 apply font color blue, fill color , orange
  - ✓ On Max and min Column apply conditional formatting as per choice.
  - ✓ Save the document
- 2) Clear formatting using “Clear formats” option
- 3) Create a new cell style by your name and apply following formats
  - ❖ Font color
  - ❖ Font style
  - ❖ Borders
  - ❖ Fill color
  - ❖ Alignments
- 4) Open Previous salary table and apply above cell style on it.
- 5) Insert chart for student record
- 6) Insert chart for salary table also.

## **MS EXCEL**

- 7) Apply sorting on student record table as per Name heading. (A to Z or Z to A)**
- 8) Apply sorting on Student record as per Total  
(Smallest to largest, or largest to smallest)**

### **Assignment -4**

- 1) Create a new EXCEL FILE IN SHEET 1 NAMING “custom list”**
- 2) Apply custom list for the following**
  - MS OFFICE**
  - MS WORD**
  - MS EXCEL**
  - MS POWERPOINT**
  - MS ACCESS**
- 3) Apply custom list for the following**
  - HARTRON COURSES**
  - HDCS**
  - CCCS**
  - DCA**
  - CCOA**
  - HDFA**
  - CCFA**
  - HDHN**
  - CCHIP**
  - HPGDCA**
  - OA**
  - FA**
  - FA+GST**
  - AUTOCAD**

**Assignment -5**

1) On another worksheet rename as “Autocorrect”

2) Apply Autocorrect as per following

|               |                                                              |
|---------------|--------------------------------------------------------------|
| <b>HDFA</b>   | <b>HARTRON DIPLOMA IN FINANCIAL ACCOUNTING</b>               |
| <b>CCFA</b>   | <b>CERTIFICATE COURSE IN FINANCIAL ACCOUNTING</b>            |
| <b>HDCS</b>   | <b>HARTRON DIPLOMA IN COMPUTER SOFTWARE</b>                  |
| <b>CCCS</b>   | <b>CERTIFICATE COURSE IN COMPUTER SOFTWARE</b>               |
| <b>HPGDCA</b> | <b>HARTRPN POST GRADUATE DIPLOMA IN COMPUTER APPLICATION</b> |
| <b>DCA</b>    | <b>DIPLOMA IN COMPUTER APPLICATION</b>                       |
| <b>CCOA</b>   | <b>CERTIFICATE COURSE IN OFFICE AUTOMATION</b>               |
| <b>HDHN</b>   | <b>HARTRON DIPLOMA IN HARDWARE &amp; NETWORKING</b>          |
| <b>CCHN</b>   | <b>CERTIFICATE COURSE IN HARDWARE &amp; NETWORKING</b>       |
| <b>OA</b>     | <b>OFFICE AUTOMATION</b>                                     |
| <b>FA</b>     | <b>FINANCIAL ACCOUNTING</b>                                  |

3) Create hyperlink between above 2 sheets, Custom list and autocorrect.

4) On new worksheet create a hyperlink with any other file of MS Word.

Assignment -6

1. Open “Student Record” table and insert 3 more columns  
apply If condition to calculate

| STUDENT RECORD SEM 1 |         |         |         |       |         |     |     |        |          |       |
|----------------------|---------|---------|---------|-------|---------|-----|-----|--------|----------|-------|
| Roll No              | Marks 1 | marks 2 | marks 3 | total | average | max | min | Result | Position | Grade |
| 1001                 | 98      | 45      | 34      | 177   | 59      | 98  | 34  |        |          |       |
| 1002                 | 50      | 40      | 20      | 110   | 36.67   | 50  | 20  |        |          |       |
| 1003                 | 79      | 67      | 56      | 202   | 67.33   | 79  | 56  |        |          |       |
| 1004                 | 90      | 78      | 77      | 245   | 81.67   | 90  | 77  |        |          |       |
| 1005                 | 56      | 89      | 88      | 233   | 77.67   | 89  | 56  |        |          |       |
| 1006                 | 34      | 34      | 30      | 98    | 32.67   | 34  | 30  |        |          |       |
| 1007                 | 56      | 87      | 45      | 188   | 62.67   | 87  | 45  |        |          |       |
| 1008                 | 78      | 76      | 69      | 223   | 74.33   | 78  | 69  |        |          |       |
| 1009                 | 89      | 65      | 86      | 240   | 80      | 89  | 65  |        |          |       |
| 1010                 | 34      | 30      | 27      | 91    | 30.33   | 34  | 27  |        |          |       |

Apply Conditions:-

Result :- if total is greater than 120 “Pass” otherwise “Ree”

Position:- If average is greater than 70, then “first” Otherwise “second”

Grade:- If Position is first then Grade “A” otherwise Grade “B”

Assignment -7

1. Insert the following table in new excel worksheet

| Roll No | Average | Position | Grade |
|---------|---------|----------|-------|
| 1001    | 61      |          |       |
| 1002    | 81      |          |       |
| 1003    | 90      |          |       |
| 1004    | 40      |          |       |
| 1005    | 66      |          |       |
| 1006    | 77      |          |       |
| 1007    | 89      |          |       |
| 1008    | 65      |          |       |
| 1009    | 98      |          |       |
| 1010    | 89      |          |       |

**Find out Position using nested if condition**

If average is greater than 80 then first, if average is greater than 60 then second otherwise third

**Find out Grade using nested if condition**

If position is first then Grade "A", If position is second then Grade "B" otherwise Grade "C"

**Assignment -8**

2. Insert the following table in new excel worksheet

| Roll No | Average | Position | Grade |
|---------|---------|----------|-------|
| 1001    | 61      |          |       |
| 1002    | 81      |          |       |
| 1003    | 90      |          |       |
| 1004    | 40      |          |       |
| 1005    | 66      |          |       |
| 1006    | 77      |          |       |
| 1007    | 89      |          |       |
| 1008    | 65      |          |       |
| 1009    | 98      |          |       |
| 1010    | 89      |          |       |

**Find out Position using nested if condition**

If average is greater than 80 then first, if average is greater than 60 then second if average is greater than 40 then third otherwise fail.

**Find out Grade using nested if condition**

If position is first then Grade "A+", If position is second then Grade "A" , if position is third then Grade "B", otherwise Grade "C"

Assignment -9

1. Insert the following table in new excel worksheet

| Emp Code | Name       | Designation | Basic Pay | DA (10%) | HRA (20%) | Bonus | Increment | Total |
|----------|------------|-------------|-----------|----------|-----------|-------|-----------|-------|
| e001     | Umakant    | Production  | 13000     |          |           |       |           |       |
| e002     | Ramakant   | Manager     | 25000     |          |           |       |           |       |
| e003     | Umesh      | Manager     | 25000     |          |           |       |           |       |
| e004     | Heena      | Production  | 19000     |          |           |       |           |       |
| e005     | Kamal Kant | Accounts    | 17000     |          |           |       |           |       |
| e006     | Preeti     | Accounts    | 15000     |          |           |       |           |       |
| e007     | Mamta      | Production  | 18000     |          |           |       |           |       |
| e008     | Jiya       | Manager     | 30000     |          |           |       |           |       |
| e009     | Amita      | Production  | 20000     |          |           |       |           |       |
| e010     | Harwinder  | Manager     | 30000     |          |           |       |           |       |

Apply following conditions to calculate DA, HRA, Bonus, and Increment.

DA-→ if Basic pay is greater or equal to 17000 then 10%, otherwise, 5%

HRA-→ if basic pay is grater or equal to 20000 then 20%, otherwise 10%

Bonus-→ if designation is “manager” than bonus is 3000, if designation is “Accounts” than bonus is 2000, if designation is “production” than bonus is 1500.

Increment→ if designation is “Production” and salary is more then 15000, Apply increment 10%, otherwise 5%

If designation is “Manager” and salary is more than 25000, apply increment 10% otherwise 5%, If designation is “accounts” and salary is equal or greater than 17000 apply increment 10% otherwise 5%.

Assignment -10

**1. Create the following table****Production chart for the period of January 2017 - 2018**

| ID  | Location | Months | Report (Qtls) | quality  | qty | Price | Total |
|-----|----------|--------|---------------|----------|-----|-------|-------|
| P01 | Punjab   | jan    | 90            | low      | 33  |       |       |
| P02 | Haryana  | march  | 98            | superior | 44  |       |       |
| P03 | Gujrat   | feb    | 67            | inferior | 54  |       |       |
| P04 | Gujrat   | june   | 45            | low      | 54  |       |       |
| P05 | Haryana  | july   | 67            | superior | 67  |       |       |
| P06 | Haryana  | dec    | 8             | inferior | 76  |       |       |
| P07 | Punjab   | nov    | 99            | inferior | 54  |       |       |
| P08 | Punjab   | aug    | 33            | inferior | 56  |       |       |
| P09 | Haryana  | jan    | 45            | superior | 54  |       |       |
| P10 | Punjab   | feb    | 56            | superior | 34  |       |       |
| P11 | Haryana  | aug    | 67            | low      | 43  |       |       |
| P12 | Punjab   | march  | 78            | low      | 54  |       |       |
| P13 | Gujrat   | sept   | 98            | superior | 65  |       |       |
| P14 | Punjab   | oct    | 65            | superior | 67  |       |       |
| P15 | Punjab   | feb    | 45            | superior | 65  |       |       |

**Conditions**

- ❖ Calculate Price-→If Quality is superior then Price Rs. 3000  
If quality is inferior then price Rs. 2000  
For low quality price is Rs. 1000  
Calculate total (Qty \*Price)
- ❖ Apply different types of filter on table
  - Location wise
  - Quality wise
  - Month wise
- ❖ Apply advance filter on table
  - Location Punjab and Report greater than 50
  - Month Jan Price Grater than 2000

**Assignment -11**

1. Using Subtotal feature apply following
  - ❖ First make sorting to which subtotal is to be applied.
  - ✓ Make a subtotal of reports Location wise
  - ✓ Make subtotal of Qty Month wise
  - ✓ Make subtotal of price Location wise
2. Find word "Gujrat" and replace it with "Mumbai"

**Assignment -12**

1. With the help of Macro record the following data  
And try to paste it in existing workbook or new worksheet

| product sheet |            |            |        |
|---------------|------------|------------|--------|
| Product ID    | Cost Price | Sale Price | Profit |
| MP/001        | 2000       | 3000       | 1000   |
| MP/002        | 1500       | 4500       | 3000   |
| MP/003        | 3000       | 5000       | 2000   |

**Assignment -13**

1. Create following Table using Concatenate, Left, right, "&", upper, lower, proper conditions

| First Name | last name | concatenate | "&" | Left | Right | Upper | Lower | Proper |
|------------|-----------|-------------|-----|------|-------|-------|-------|--------|
| Sunaina    | rani      |             |     |      |       |       |       |        |
| Mohit      | Mehra     |             |     |      |       |       |       |        |
| Priya      | Arora     |             |     |      |       |       |       |        |
| Heena      | Khan      |             |     |      |       |       |       |        |
| Umesh      | Bharti    |             |     |      |       |       |       |        |

**Assignment -14**

Create following Table

| ID           | Name | Brand   | Cost | sale | profit |
|--------------|------|---------|------|------|--------|
| kk/001       |      | Sony    | 1000 |      |        |
| kk/002       |      | LG      | 2000 |      |        |
| kk/003       |      | samsung | 1700 |      |        |
| kk/004       |      | HCL     | 1800 |      |        |
| mm/001       |      | LG      | 500  |      |        |
| mm/002       |      | samsung | 600  |      |        |
| mm/003       |      | Sony    | 700  |      |        |
| mm/004       |      | HCL     | 300  |      |        |
| total profit |      |         |      |      |        |

Condition ->

- if left characters of ID are "kk" then write Keyboard... if "mm" then write "mouse"..
- sale price is 10% of cost price plus. =D2+D2\*10%

## MS EXCEL

2. Profit is (Sale- cost)
3. Calculate total profit

### Assignment -15

1. Create following table and apply Goal seek.

| Product ID   | name       | Qt | Cost | Sale | Profit |
|--------------|------------|----|------|------|--------|
| p098         | wheat      | 10 | 500  | 800  |        |
| p099         | candies    | 15 | 700  | 900  |        |
| p100         | snackes    | 12 | 600  | 900  |        |
| p101         | cookies    | 15 | 100  | 200  |        |
| p102         | sweets     | 16 | 600  | 1000 |        |
| p103         | dry fruits | 17 | 900  | 1500 |        |
| total profit |            |    |      |      |        |

#### Condition:-

- Calculate profit : =E2\*C2-D2\*C2
- Calculate total profit
  - ❖ Apply goal seek follow this condition
- What would be the sale price of wheat if you want to see profit Rs. 30000
- What would be sale price of candies if you want to see profit Rs. 35000
- What would be sale price of cookies if you want to see profit Rs. 45000

### Assignment -16

Consider the following table in scenario manager:

|                         |
|-------------------------|
| <b>MOUSE PRODUCTION</b> |
|-------------------------|

| Parts         | Cost |
|---------------|------|
| Body          | 30   |
| Circuit board | 50   |
| Wire          | 20   |
| Labour        | 20   |
| Total cost    | 120  |

|               |
|---------------|
| Mouse price=? |
|---------------|

| Low cost | High cost |
|----------|-----------|
| 25       | 40        |
| 40       | 60        |
| 16       | 25        |
| 20       | 20        |

**Assignment -17**

Consider the following table in scenario manager:

2)

|                                   |
|-----------------------------------|
| <b>Surya company pipe fitting</b> |
|-----------------------------------|

| JAN     |       |
|---------|-------|
| Plastic | 20000 |
| Power   | 1500  |
| labour  | 2000  |
| others  | 500   |
| Total   | 24000 |

| FEB     |       |
|---------|-------|
| Plastic | 19000 |
| Power   | 1350  |
| labour  | 1900  |
| others  | 400   |

| MAR     |       |
|---------|-------|
| Plastic | 21000 |
| Power   | 2100  |
| labour  | 1550  |
| others  | 400   |

**Assignment -18**

2. Create following table and apply data validation.

Quarterly Production Report in KG

| Prod ID | Jan | feb | march | total |
|---------|-----|-----|-------|-------|
| a01     | 300 | 400 | 600   | 1300  |
| a02     | 400 | 500 | 700   | 1600  |
| a03     | 500 | 600 | 150   | 1250  |
| a04     | 600 | 500 | 800   | 1900  |

**Data validation:→**

- In product ID only 3 characters are allowed
- In Jan month column value should be greater than 250, if you enter value less then it must show error message
- In Feb month column value should be less than 900, if you enter value greater than 900, error message must show
- In march month column value should be in between 500 to 1000
- In total column no negative values are allowed.
- Customize error alert message with error message “please check validation”
- Clear all validations that you applied in table.

**Assignment -19****1. On new worksheet apply following formulas and functions**

- Calculate Mode of following numbers  
(98,9) (87, 7) (65,8) (76,9) (65,5)
- Insert today's Date (Formula – Today)
- Insert current date & current time
- Find out week day of given below dates  
(10/09/2017) (16/4/2017) (12/01/2017) (09/09/2017)
- Find out difference between given below dates

| Prev<br>Date | Current date | Difference |
|--------------|--------------|------------|
| 09/09/2010   | 10/10/2017   |            |
| 10/10/2011   | 01/03/2012   |            |
| 05/05/2017   | 10/09/2017   |            |
| 07/09/2017   | 09/12/2017   |            |

- Using Product formula make multiplication of following values

|    |   |  |
|----|---|--|
| 98 | 9 |  |
| 65 | 8 |  |
| 98 | 5 |  |
| 67 | 8 |  |

- Find out square root of given below values using sqrt formula

|    |  |
|----|--|
| 12 |  |
| 45 |  |

## MS EXCEL

|     |  |
|-----|--|
| 56  |  |
| 99  |  |
| 189 |  |

➤ Find out power of following numbers

| Number | Power |  |
|--------|-------|--|
| 7      | 2     |  |
| 9      | 3     |  |
| 9      | 4     |  |
| 18     | 2     |  |

### Assignment -20

1. Create multiplication of table from 1 to 10  
Using data table option.
2. Create multiplication table from 11 to 15 using data table.
3. Set column width 25 row height 15 using format option
4. Open 2 worksheet at one time and apply "Arrange all" Option (Tiled, Vertical Cascade etc.)
5. Move one worksheet to another workbook
6. Apply any formula on 1<sup>st</sup> worksheet on basis of data in 2<sup>nd</sup> worksheet.
7. Save file using save workspace, check the effect of using this feature.
8. Protect your worksheet with password.
9. Open any previous file .
10. Split your worksheet from any row
11. Hide the data of excel worksheet

**Assignment -21**

**1. Create following table in new workbook.**

| <b><u>Salary record</u></b> |      |        |          |              |              |         |             |            |
|-----------------------------|------|--------|----------|--------------|--------------|---------|-------------|------------|
| Sr. no                      | Id   | Name   | location | Post         | Basic salary | EPF 12% | EPF 13.61 % | Net salary |
| 1                           | E01  | Rahul  | Punjab   | Account head | 15000        |         |             |            |
| 2                           | E02  | Punit  | YNR      | Admin        | 16000        |         |             |            |
| 3                           | E03  | Madhu  | Jagdhari | Accountant   | 18000        |         |             |            |
| 4                           | E04  | Vinit  | Karnal   | Engineer     | 25000        |         |             |            |
| 5                           | E05  | Namish | Panipat  | DEO          | 35600        |         |             |            |
| 6                           | E06  | Kumd   | Noida    | Clerk        | 36500        |         |             |            |
| 7                           | E07  | puran  | Sonipat  | Manager      | 15000        |         |             |            |
| 8                           | E08  | Sumit  | Punjab   | Production   | 36000        |         |             |            |
| 9                           | E09  | amit   | Haryana  | HR manager   | 45000        |         |             |            |
| 10                          | E010 | neha   | YNR      | DEO          | 25000        |         |             |            |

**1) Apply following conditions on above table**

- Calculate EPF, Total salary
- Freeze top row and check the effect
- Set print area of page
- Take print out of this salary sheet in landscape on A4 size paper.
- Apply vlookup on this table
- Copy and paste special in another sheet as transpose
- Then apply Hlookup on this table
- Rename worksheets as Hlookup and vlookup

**Assignment -22**

**1. Create following table on sheet1**

**Rename sheet as "Sem1"**

## MS EXCEL

| student performance in sem 1 |         |        |         |
|------------------------------|---------|--------|---------|
| Roll no                      | marks 1 | marks2 | marks 3 |
| 101                          | 98      | 45     | 87      |
| 102                          | 78      | 56     | 67      |
| 103                          | 65      | 67     | 87      |
| 104                          | 77      | 78     | 98      |
| 105                          | 87      | 56     | 76      |

### 2. Create following table on sheet2

Rename sheet as “Sem2”

| student performance in sem 2 |         |        |         |
|------------------------------|---------|--------|---------|
| Roll no                      | marks 1 | marks2 | marks 3 |
| 101                          | 34      | 66     | 67      |
| 102                          | 45      | 77     | 45      |
| 103                          | 56      | 67     | 65      |
| 104                          | 34      | 56     | 45      |
| 105                          | 45      | 45     | 56      |

### 3. Copy and paste the table on sheet 3 rename as “final record”

### 4. Add the marks of sem 1 and sem 2 on sheet 3 using consolidation.

### 5. Protect your workbook with password.

(Do not protect worksheet)

## Assignment -23

### 1. Create following table on new workbook sheet 1 renaming as “Product Qty”

| production report (quantity in qtls) |       |       |       |
|--------------------------------------|-------|-------|-------|
| prod Id                              | qty 1 | qty 2 | qty 3 |
| ok1                                  | 10    | 20    | 20    |
| ok2                                  | 20    | 30    | 30    |
| ok3                                  | 10    | 10    | 40    |
| ok4                                  | 30    | 40    | 20    |
| ok5                                  | 40    | 20    | 50    |

### 2. Create following table on sheet 2 renaming as “Product price”

| production report (Price) |         |         |         |
|---------------------------|---------|---------|---------|
| prod Id                   | price 1 | price 2 | Price 3 |
| ok1                       | 100     | 200     | 200     |
| ok2                       | 200     | 300     | 300     |
| ok3                       | 100     | 100     | 400     |
| ok4                       | 300     | 400     | 200     |

## MS EXCEL

|     |     |     |     |
|-----|-----|-----|-----|
| ok5 | 400 | 200 | 500 |
|-----|-----|-----|-----|

**3)Copy and Paste the format of table on sheet 3 renaming as Total value**

**Using consolidation calculate total value (using product formula)**

| production report (Total Price) |               |               |               |
|---------------------------------|---------------|---------------|---------------|
| prod Id                         | Total value 1 | Total value 2 | Total value 3 |
| ok1                             |               |               |               |
| ok2                             |               |               |               |
| ok3                             |               |               |               |
| ok4                             |               |               |               |
| ok5                             |               |               |               |

### Assignment -24

- 1. If an Amount of Rs. 1,00,000 is deposited @ 10% rate for 5 years, then what would be its value after 5 years.**
- 2. If an amount of Rs.5,00,000 receive after 5 years @ 10% rate, then what would be its present value**
- 3. If an instalment of Rs. 10,000 is to be deposited for 2 years @ 5% rate, what would be its future value.**
- 4. If a loan of Rs. 7,00,000 was given at 10% rate for 5 years, calculate its instalment using (PMT)**
  - Yearly
  - Half yearly

- Monthly
- Quarterly

**5. If an amount o Rs. 100000 was given at 12% rate for 5 year, calculate its instalment using (PMT)**

- Yearly
- Half yearly
- Monthly
- Quarterly

### **Assignment -25**

**1. Make breakups of above given instalment on 4 different sheets using (PPMT, IPMT,PMT)**

**Also check differences of amount of loan.**

**Amount = 500000, rate= 10% , time =5 year**

**2. Make breakups of above given instalment on 4 different sheets using (PPMT, IPMT, PMT)**

**Amount = 100000, rate= 5% , time =8 year**

**3. Create a loan sheet using automatic calculation (Create a loan sheet using automatic calculation**

**Loan amortization**

**Amount = 500000, rate = 10%, time 5 year**

**Check effect**

- Yearly
- Half yearly
- Monthly
- Quarterly

### **Assignment -26**

**Create following table**

## MS EXCEL

| Purchase date | payment date | amount | interest (10%) | total |
|---------------|--------------|--------|----------------|-------|
| 01-07-10      | 20-07-17     | 10000  |                |       |
| 05-07-10      | 30-07-10     | 15000  |                |       |
| 10-07-10      | 01-08-10     | 12000  |                |       |
| 15-07-10      | 01-09-10     | 19000  |                |       |
| 16-07-10      | 01-09-10     | 18000  |                |       |
| 18-07-10      | 25-07-10     | 25000  |                |       |
| 20-07-10      | 01-08-10     | 22000  |                |       |

- 1) if difference between purchase date and payment date is more than 20 days then calculate interest 10% otherwise 0
- 2) Calculate total amount
- 3) Apply protection complete worksheet.
- 4) Using track changes option Make changes in above as per following ,  
Purchase date- 01-06-2010 instead of 01-07-2010.  
05-06-2010 instead of 05-07-2010.  
Also apply accept and reject changes option.
- 5) Insert comment to Interest cell (10% if days exceeds 20)

### Assignment -27

1. Open any previous file of excel
2. Apply background on worksheet
3. Insert header in 3 sections  
Left:- Hartron Jagadhri  
Centre :- Course name  
Right:- Batch time
4. Insert page number in footer
5. Check header footer in print preview
6. Convert Column numbering of excel in Numeric numbers
7. Customize quick access toolbar with options ( Cut, Copy , Paste, auto sum, clear format)
8. Insert document of MS Word in excel & type features of MS excel

### Assignment -28

## MS EXCEL

Create the following table

| s.no | product name | brand   | qty | price | total  |
|------|--------------|---------|-----|-------|--------|
| 1    | Monitor      | LG      | 10  | 10000 | 100000 |
| 2    | printer      | Sony    | 5   | 15000 | 75000  |
| 3    | Keyboard     | Samsung | 20  | 12000 | 240000 |
| 4    | Monitor      | LG      | 8   | 5000  | 40000  |
| 5    | Monitor      | Sony    | 10  | 6000  | 60000  |
| 6    | Monitor      | Samsung | 12  | 7000  | 84000  |
| 7    | Keyboard     | LG      | 12  | 3000  | 36000  |
| 8    | printer      | Sony    | 10  | 4000  | 40000  |
| 9    | Keyboard     | Samsung | 9   | 5000  | 45000  |

- ✓ Find out largest value of Printer of Sony brand (DMAX)
- ✓ Find out largest value of Monitor of LG brand (DMAX)
- ✓ Find out smallest value of keyboard of SAMSUNG brand (DMIN)
- ✓ Find out Total quantity of Monitor of LG brand (DSUM)
- ✓ Find out Total Price of keyboard of SAMSUNG brand (DSUM)
- ✓ Find out total price of LG brand product (SUMIF)
- ✓ Count Total product of monitor (COUNTIF)
- ✓ Count how many items (COUNTA)
- ✓ Count the number of working cells (COUNT)

### Assignment -29

| Name of employee | Item sold       | Qty sold | Sale date  |
|------------------|-----------------|----------|------------|
| Parneet          | Laptop          | 8        | 1/5/2012   |
| Kamal            | Computer        | 5        | 1/9/2014   |
| Rohit            | Pen drive       | 6        | 1/6/2015   |
| Sonia            | Refrigerator    | 4        | 1/5/2012   |
| Komal            | Air conditioner | 8        | 10/12/2021 |
| Shubham          | pendrive        | 9        | 10/5/2022  |
| vishal           | laptop          | 5        | 5/5/2011   |

- ✓ Consider the following table with the help of pivot table
- ✓ Consider the following table with the help of pivot table with chart.

### Assignment-30

Create the following table in Ms Excel:

## MS EXCEL

| Emp code | Emp Name | Branch     | Basic salary | Med.Allowence | total |
|----------|----------|------------|--------------|---------------|-------|
| E01      | Reena    | Accounts   | 10000        |               |       |
| E02      | Meena    | Sales      | 9600         |               |       |
| E03      | Riya     | Sales      | 10000        |               |       |
| E04      | Priya    | Production | 5000         |               |       |
| E05      | Suhani   | Sales      | 5000         |               |       |

Conditions:

- ✓ Calculate medical allowance as 8% of basic salary.
- ✓ Calculate total pay of Each Employee.
- ✓ Find out average basic salary of sales branch.
